LEGEND BOUCLES® – TIMEKEEPING - CLASSIC

The timekeeping system for the Classic put in place for the 2018 edition of the Legend Boucles® 2016 is operated via the use of transponders.

Each competitor will be required to place its transponder in the car during the scrutineering on Thursday or Friday. The transponder will be fixed on the back windshield with our assistance.

The start of RT will be given at minute completed or 30 seconds, except for show stages using a FLY START. At point zero of distance of the stage will be the start line except for show stage where zero distance is taken to flying start line where timekeeping is starting. A BLUNIK clock will be situated, which will take the exact starting time (to the nearest one-tenth of a second) in case of show RT. For any other RT, the Blunik clock is only an indication.

The co-driver is responsible for the transponder. He (or she) is in charge of checking that it is well fixed at all times.

The official times of the stages are those as recorded in the chip, the notes being of a purely informative character.
